Art Unit: 1624

DETAILED ACTION

Claims 1-12 are pending in the application.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 10-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In evaluating the enablement question, several factors are to be considered. In re Wands, 8 USPQ2d 1400 (Fed. Cir. 1988); Ex parte Forman, 230 USPQ 546. The factors include: 1) The nature of the invention, 2) the state of the prior art, 3) the predictability or lack thereof in the art, 4) the amount of direction or guidance present, 5) the presence or absence of working examples, 6) the breadth of the claims, and 7) the quantity of experimentation needed.

The nature of the invention in the instant application, is claims which embrace substituted dibenzodiazepines.

HOW TO USE: Claims 10-12 are to a pharmaceutical composition and method of use of the compounds of formula (I) to treat a disease or disorder associated with RXR-antagonism. Any evidence presented must be commensurate in scope with the claims and must clearly demonstrate the effectiveness of the claimed compounds. The

Application/Control Number: 10/550.776

Art Unit: 1624

scope of the method claims are not adequately enabled solely based on its inhibitory effect on the retinoid X receptor provided in the specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. Additionally, Claims 10 and 12 are the method of use of the compounds of the instant invention for use in delaying the progression of, preventing or treating any and all diseases and/or disorders associated with retinoid X receptor, which is not remotely enabled. It is difficult to treat many of the disorders claimed herein.

No screening protocol(s) are ever described. Thus, no evidence of in vitro effectiveness is seen in the specification for one of the instantly claimed dibenzodiazepine compounds. In general, pharmacological activity is a very unpredictable area. In cases involving physiological activity "the scope of the enablement obviously varies inversely with the degree of unpredictability of the factors involved." In re Fisher, 427 F.2d 833, 166 USPQ 18 (CCPA 1970). Since this case involves unpredictable in-vivo physiological activities, the scope of the enablement given in the disclosure presented here was found to be low.

The specification has only 16 working examples on the use of the substituted dibenzodiazepines. There must be evidence to justify the contention that the claimed compounds can be useful in the treatment of "retinopathy, nephropathy, neuropathy, hyperlipidemia, obesity, dystipidemia, osteoporosis, etc.".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/550,776 Page 4

Art Unit: 1624

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being
indefinite for failing to particularly point out and distinctly claim the subject matter which
applicant regards as the invention. The following reasons apply:

- a. Claims 1-4 and claims dependent thereon are vague and indefinite in that
 it is not known what is meant by the variables R1, R2, R3 and R4 in formulae (I),
 (IIa), (IIb) and (IIc).
- b. Claims 1, 2, 6, 7 and 8 and claims dependent thereon are vague and indefinite in that it is not known what is meant by the definition of R_1 , R_2 , R_3 and R_4 in claims 1, 2, 6, 7 and 8 where there are no variables R_1 , R_2 , R_3 and R_4 in formulae (I), (IIa), (IIb) and (IIc).
- c. Claim 1 is vague and indefinite in that it is not known what is meant by the moiety -ON in the definition of R_3 .
- d. Claim 2 is vague and indefinite in that it is not known what is meant by the period which appears at the end of line two indicating the end of the claim which is not so.
- e. Claim 4 is vague and indefinite in that it is not known what is meant by the period which appears at the end of line one indicating the end of the claim which is not so.
- f. Claim 6 recites the limitation "cyano" in the definition of R₃. There is insufficient antecedent basis for this limitation in the claim.
- g. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered

Application/Control Number: 10/550,776 Page 5

Art Unit: 1624

indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 8 recites the broad recitation C₁-C₇-alkyl, and the claim also recites methyl or ethyl which is the narrower statement of the range/limitation.

- Claims 9, 10 and 12 are vague and indefinite in that it is not known what is meant by "formula (I)" where there is no formula (I) in these independent claims.
- i. Claim 10 provides for the use of the compounds of formula (I), but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
- j. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered

Application/Control Number: 10/550,776 Page 6

Art Unit: 1624

indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 10 and 12 recite the broad recitation RXR-antagonism, and the claim also recites diabetes, type-2-diabetes, complication of diabetes, obesity, dyslipidemia and osteoporosis which is the narrower statement of the range/limitation.

- k. Regarding claims 10 and 12, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
- I. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in Exparte

Art Unit: 1624

Wu, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of Ex parte Steigewald, 131 USPQ 74 (Bd. App. 1961); Ex parte Hall, 83 USPQ 38 (Bd. App. 1948); and Ex parte Hasche, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 12 recites the broad recitation formula (I), and the claim also recites formulae (IIc), (IIIe), (IIIIa), (IIIIb), (IIIId), (IIIId), (IIIIe) and (IIIf) which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 101

3. Claim 10 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example Ex parte Dunki, 153 USPQ 678 (Bd.App. 1967) and Clinical Products, Ltd. v. Brenner, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda L. Coleman whose telephone number is 571-272-0665. The examiner can normally be reached on 9:30-6:00.

Art Unit: 1624

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
